

Stainless steel platform scale KERN SXS

High-quality stainless steel platform scale with stainless steel IP68 display device – now also as high resolution version with high-resolution display

Recipe-weighing

Thanks to the stainless steel design of the evaluation unit and platform with smooth surface – the scale is rust-free and easy to clean

Stainless steel platform scale KERN SXS

Features

- Ideal for the robust industrial applications
- II Platform: made entirely of stainless steel, hermetically welded stainless steel load cell, dust and spray protection to IP68. Substruction in wing design, extremely resistant to bending. Earthed weighing plate, to reduce static
- · Display device: Stainless steel, protection against dust and water splashes IP68, integrated power supply
- Suitable for the ever-increasing hygienic requirements in the food industry
- · Wall mount for display device, standard
- · Superior display size: digit height 55 mm, bright backlight for easy reading of weighing results, even in poor lighting conditions
- · Easy-to use KERN menu structure with printout of weighing results which can be intuitively adapted
- Thanks to interfaces such as RS-232, RS-485 and Bluetooth (optional) the scale can easily be connected to existing networks and facilitates the data exchange between the scale and printer

Technical data

- · Large backlit LCD display, digit height 55 mm
- · Weighing plate dimensions, stainless steel W×D×H
 - A 300×240×86 mm, see larger picture
- B 400×300×89 mm
- 500×400×123 mm
- **■** 650×500×133,5 mm
- · Dimensions of display device W×D×H 232×170×80 mm
- · Cable length of display device approx. 2,5 m

Accessories

- 2 Stand to elevate display device, for models with weighing plate size A-D Height of stand approx. 200 mm, KERN IXS-A02
- B-D Height of stand approx. 400 mm, KERN IXS-A03
- D Height of stand approx. 600 mm, KERN IXS-A04
- 3 Internal rechargeable battery pack, operating time up to 80 h without backlight, charging time approx. 12 h, must be ordered at purchase, KERN GAB-A04
- · Data interface RS-232, interface cable included, approx. 1,5 m, must be ordered at purchase, KERN KXS-A04
- Data interface RS-485, must be ordered at purchase, KERN KXS-A01
- · Foot switch, must be ordered at purchase, KFRN KXS-A03
- · Bluetooth data interface for wireless data transfer to PC or tablets, must be ordered at purchase, not in combination with verification, KERN KXS-A02
- · Further details, plenty of further accessories and suitable printers see accessories

STANDARD

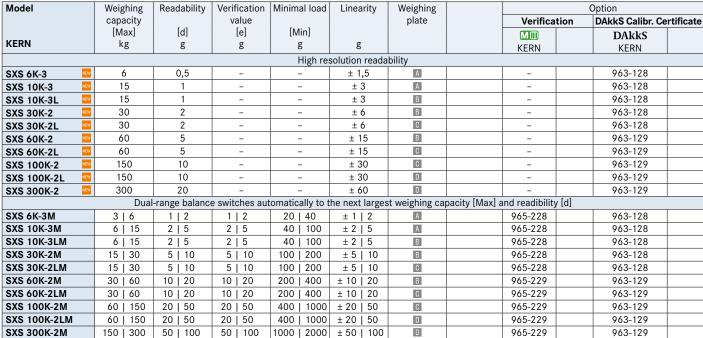

Note: For applications that require verification, please order verification at the same time, initial verification at a later date is not possible. Verification at the factory, we need to know the full address of the location of use.

Either RS-232 or RS-485 can be installed and used

Pictograms

Internal adjusting:

Quick setting up of the balance's accuracy with internal adjusting weight (motordriven)

Adjusting program CAL:

For quick setting up of the balance's accuracy. External adjusting weight required

Easy Touch:

Suitable for the connection, data transmission and control through PC or tablet.

Memory:

Balance memory capacity, e.g. for article data, weighing data, tare weights, PLU etc.

Alibi memory:

Secure, electronic archiving of weighing results, complying with the 2014/31/EU standard.

Data interface RS-232:

To connect the balance to a printer, PC or network

RS-485 data interface:

To connect the balance to a printer, PC or other peripherals. Suitable for datatransfer over large distances. Network in bus topology is possible

USB data interface:

To connect the balance to a printer, PC or other peripherals

Bluetooth* data interface:

To transfer data from the balance to a printer, PC or other peripherals

WiFi data interface:

To transfer data from the balance to a printer, PC or other peripherals

Control outputs (optocoupler, digital I/O):

To connect relays, signal lamps, valves, etc.

Analogue interface:

to connect a suitable peripheral device for analogue processing of the measurements

Interface for second balance:

For direct connection of a second balance

Network interface:

For connecting the scale to an Ethernet network

KERN Communication Protocol (KCP):

It is a standardized interface command set for KERN balances and other instruments, which allows retrieving and controlling all relevant parameters and functions of the device. KERN devices featuring KCP are thus easily integrated with computers, industrial controllers and other digital systems

GLP/ISO log:

The balance displays serial number, user ID, weight, date and time, regardless of a printer

GLP/ISO log:

With weight, date and time. Only with KERN printers.

Piece counting:

Reference quantities selectable. Display can be switched from piece to weight

Recipe level A:

The weights of the recipe ingredients can be added together and the total weight of the recipe can be printed out

Recipe level B:

Internal memory for complete recipes with name and target value of the recipe ingredients. User guidance through display

Totalising level A:

The weights of similar items can be added together and the total can be printed out

Percentage determination:

Determining the deviation in % from the target value (100 %)

Weighing units:

Can be switched to e.g. nonmetric units. See balance model. Please refer to KERN's website for more details

Weighing with tolerance range:

(Checkweighing) Upper and lower limiting can be programmed individually, e.g. for sorting and dosing. The process is supported by an audible or visual signal, see the relevant model

Hold function:

(Animal weighing program) When the weighing conditions are unstable, a stable weight is calculated as an average value

Protection against dust and water splashes IPxx:

The type of protection is shown in the pictogram.

*The Bluetooth® word mark and logos are registered trademarks owned by Bluetooth SIG, Inc. and any use of such marks by KERN & SOHN GmbH is under license. Other trademarks and trade names are those of their respective owners.

Suspended weighing:

Load support with hook on the underside of the balance

Battery operation:

Ready for battery operation. The battery type is specified for each device

Rechargeable battery pack:

Rechargeable set

Universal plug-in power supply:

with universal input and optional input socket adapters for A) EU, CH, GB; B) EU, CH, GB, USA; C) EU. CH. GB. USA, AUS

Plug-in power supply:

230V/50Hz in standard version for EU, CH. On request GB, USA or AUS version available

Integrated power supply unit:

Integrated in balance. 230V/50Hz standard EU. More standards e.g. GB, USA or AUS on request

Weighing principle: Strain gauges:

Electrical resistor on an elastic deforming body

Weighing principle: Tuning fork:

A resonating body is electromagnetically excited, causing it to oscillate

Weighing principle: Electromagnetic force compensation:

Coil inside a permanent magnet. For the most accurate weighings

Weighing principle: Single cell technology: Advanced version of the force compensation

principle with the highest level of precision

Verification possible:

The time required for verification is specified in the pictogram

DAkkS calibration possible (DKD):

The time required for DAkkS calibration is shown in days in the pictogram

Factory calibration (ISO):

The time required for Factory calibration is shown in days in the pictogram

Package shipment:

The time required for internal shipping preparations is shown in days in the pictogram

Pallet shipment:

The time required for internal shipping preparations is shown in days in the pictogram

KERN - Precision is our business

To ensure the high precision of your balance KERN offers you the the appropriate test weight in the international OIML error limit classes E1-M3 from 1 mg - 2500 kg. In combination with a DAkkS calibration certificate the best pre-requisite for proper

The KERN DAkkS calibration laboratory today is one of the most modern and bestequipped DAkkS calibration laboratories for balances, test weights and force-measure-

Thanks to the high level of automation, we can carry out DAkkS calibration of balances, test weights and force-measuring devices 24 hours a day, 7 days a week.

. . .

- DAkkS calibration of balances with a maximum load of up to 50 t
- DAkkS calibration of weights in the range of 1 mg 2500 kg
- Volume determination and measuring of magnetic susceptibility (magnetic characteristics) for test weights
- Database supported management of checking equipment and reminder service
 Calibration of force-measuring devices
- DAkkS calibration certificates in the following languages DE, EN, FR, IT, ES, NL, PL
- Conformity evaluation and reverification of balances and test weights
